DETAILED ACTION

1. The art unit designated for this application has changed. Applicants(s) are hereby informed that future correspondence should be directed to Art Unit 1631.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-16, 29, and 31, drawn to a computer-implemented method and program product on a computer-readable medium for modeling ligand-protein binding interactions and the model resulted from the said method, classified in class 702, subclasses 19, 22, and 27.
 - II. Claims 17-19, 30 and 32, drawn to a computer-implemented method and program product on a computer-readable medium for predicting the structure of a protein binding site for a protein having an unknown binding site, classified in class 702, subclasses 19, 22, and 27.
 - III. Claims 20-28 and 33, drawn to a computer-implemented virtual screening and program product on a computer-readable medium for screening a ligand library, classified in class 702, subclasses 19, 22, and 27.
 - IV. Claims 34 and 35, drawn to a computer-implemented method of generating a pharmacophore, classified in class 702, subclasses 19, 22, and 27.
3. The inventions of Groups I-IV are distinct inventions because they are directed to different methods regarding the critical active steps therein. For Groups I-IV, each group requires a different set active steps for implement the said method to meet the intend goal of each invention. It is acknowledged that the commonality of these methods is the structural

information directed to a protein. However, the completely distinct usages of the said structural information of each Group support the undue search burden if they were examined together.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1.
